Dear Parents and Students,

It's that time of the year again! We are ready to launch our 2011 **Summer Reading Projects** for elementary through middle school students. We are excited about continuing our tradition of promoting reading and life-long learning through our reading program. Summer reading is an effective way to maintain and even increase the literacy skills your child learned the previous school year.

Please note that each Kindergarten through 8th grade student is required to read a book and complete the corresponding project. You may also choose additional books to read by visiting Book Adventure. Please assist your child in selecting books that are age/grade appropriate. Book Adventure is found at [www.bookadventure.com](http://www.bookadventure.com).

In addition to summer reading, students entering grades 5-8 are required to complete a summer math packet. The Summer Math Packet should be completed in its entirety and all work must be shown. Students are not permitted to use calculators. Students should be able to complete most problems on their own, however, more advanced problems of what will be covered in the upcoming year are also included. Example problems will be given to assist students when needed. Summer Math Packets can be downloaded and printed by visiting the BCA website [www.blairchristianacademy.org](http://www.blairchristianacademy.org). **Please put the pages in order and staple them together before submitting them on August 29, 2011.**

Parents, please verify that your student has completed his/her summer assignments. Grades will be reflected on the first quarter report card.

Thank you for supporting Blair Christian Academy's reading and math initiatives! It is advised that your child begin working on these assignments right away. If students work on their math packets daily for 20 minutes, they will complete the assignment well before the end of summer. We pray that your family will have a refreshing break!

In His Service,  
Ms. Kia E. Jenkins, M.A.  
Elementary Administrator/Program Director
